Key Digital Celebrates Benefits of Business Partnership with D-Tools

The numbers are in, and Key Digital's partnership with D-Tools continues to allow residential and commercial system integrators to increase overall revenues while reducing the time and costs associated with the installation and integration of low-voltage systems. Using D-Tools vast system building appliances, system integrators have the means to get their designs quickly into the hands of their clients and installers and take the hassle of merging separate documents out of the mix.

'System Integrator', the award-winning software from Key Digital business partner D-Tools, is a total design solution that utilizes Autodesk® AutoCAD and Microsoft® Visio for comprehensive system design, documentation and project management for AV, Networking, and Security systems.

"We want to help dealers configure and quote entire systems." said Michael Lakhter, VP of Sales. "With help from our business partners, such as D-Tools, our customers specified Key Digital products into thousands of installations throughout 2010, and ensured that the installations were designed and specified correctly every time."

To find out how you can streamline your business and get more information on D-Tools, visit the [D-Tools Website](#)
