Key Digital Announces Compass Alliance™ Partners for Compass Control®

Mount Vernon, NY. Key Digital Systems, Inc. – June 13, 2012 – Key Digital® is proud to announce the Compass Alliance™ Partners (CAP) – a group of third party hardware providers who were essential in the development of Compass Control®. Compass Control® represents the first fully integrated major control system built from the ground up to use Apple's iOS 5 devices – iPad®, iPhone®, and iPod touch® – as its backbone.

The Compass Alliance™ Partners (CAP) have created a fully integrated control system with driver support for hardware from the following brands: Aprilaire, Boston Acoustics®, ClearOne®, Denon, Furman, ICREaltime Security Solutions®, iPort®, Key Digital, LG, Lutron®, Luxul, Marantz®, MechoSystems, Onkyo®, Panamax, Primeview, Russound®, SurgeX, and Wolfvision®. Combining the knowledge and expertise from the different CAP brands has allowed Compass Control® to develop into a complete turnkey residential or commercial control solution.

This partnership has given Key Digital® and Compass Control® access to some of the best brands currently available in the AV, HVAC, lighting, and wireless routing product fields. Compass Alliance™ Partners have been integral from day one by providing both support from their respective engineering teams and command code sets for control. Key Digital® is excited to be pairing with such a highly regarded group of companies which makeup the Compass Alliance™ Partners.

Compass Control® has the ability to control devices via RS-232, IR, or via TCP/IP. This new control system provides installers with bi-directional IR, two-way RS-232 with feedback, and two-way TCP/IP control for unlimited flexibility and maximum compatibility with new or existing devices. Compass Control® also provides control via relays

and sensors demonstrating its nature as a powerful integration tool. When programming the system via the Compass Navigator[®] PC editor software, installers are given three separate database managers to make programming faster than traditional control systems. Compass Navigator[®] also enables installers to edit command code sets which allows Compass Control[®] to be tailored to each and every system installation.

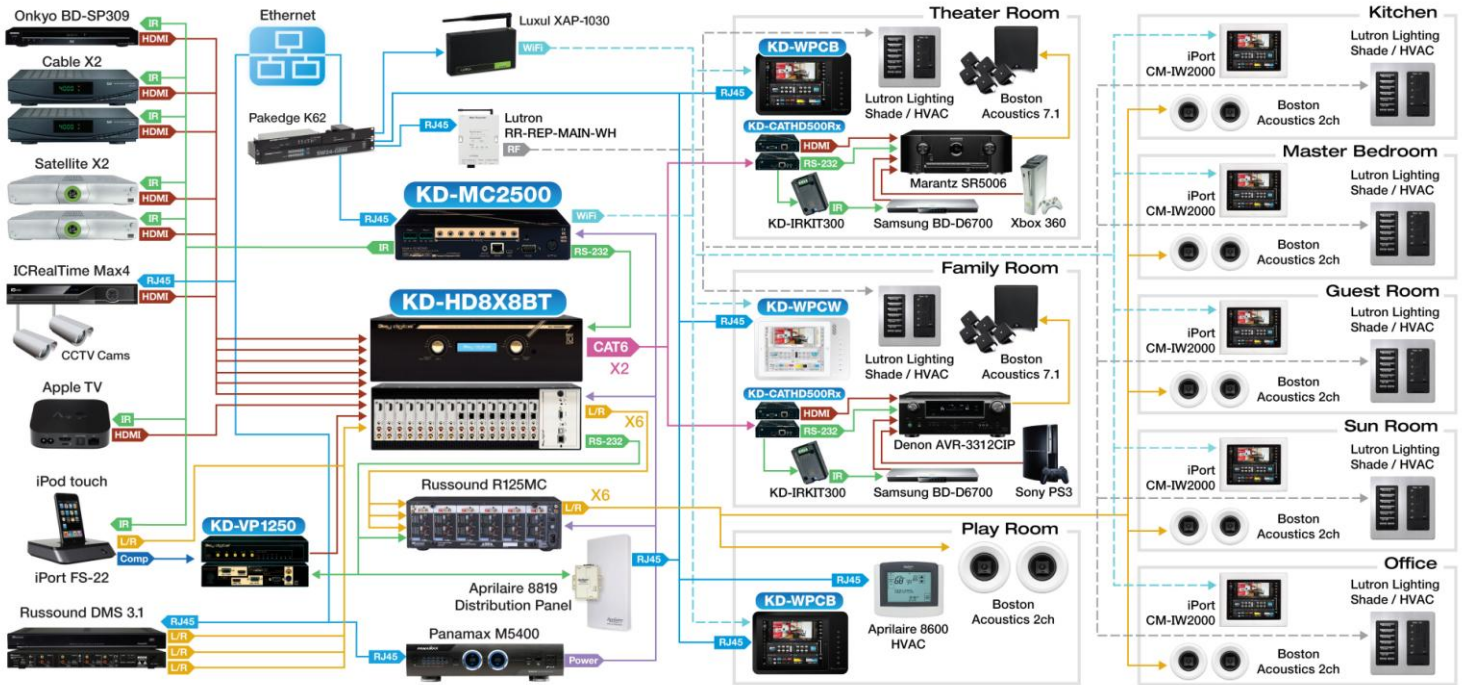

Key Digital Vice-President for Sales, Michael Lakhter, commented on Compass Control's readiness to take on market challenges, "With the combined efforts of all of our Compass Alliance Partners, Compass Control[®] represents the culmination of our efforts to create the most powerful, most

user-friendly, and most comprehensive control system available on the market today."

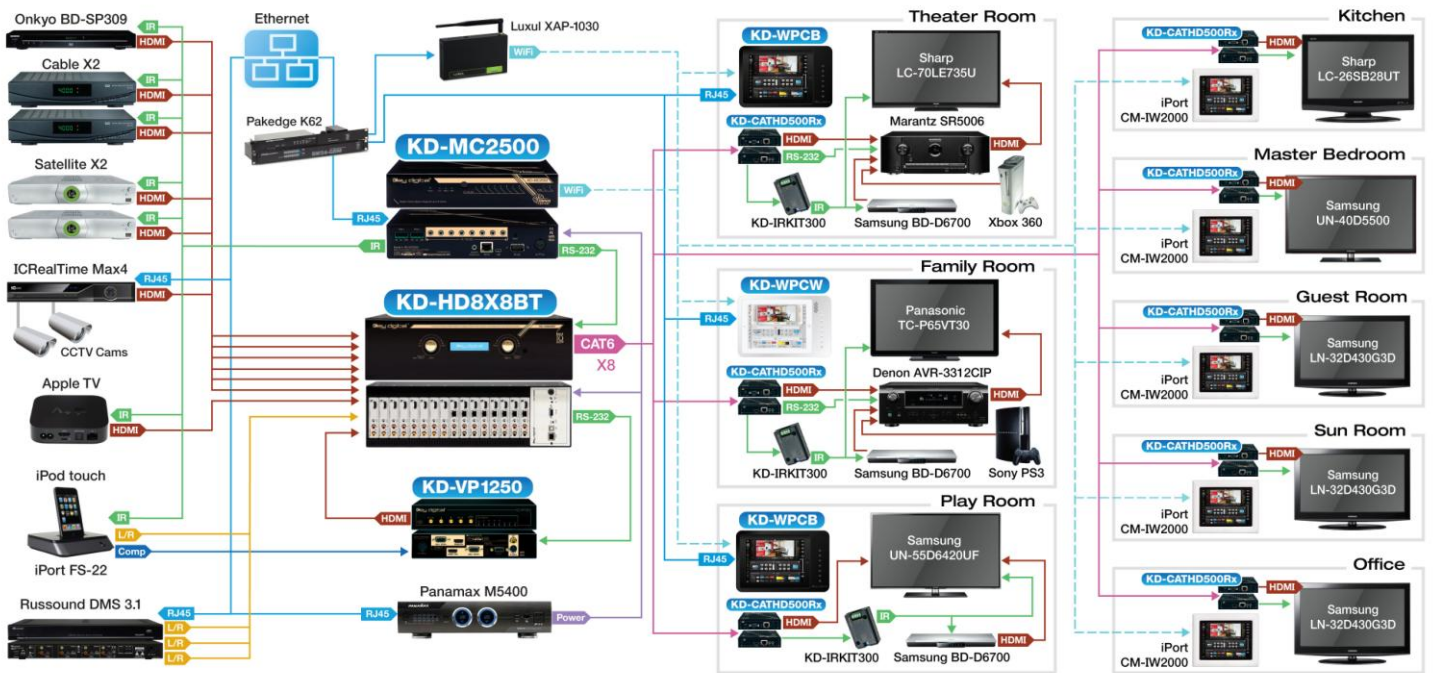

Come see today why Key Digital[®] and CAP are *the* Experts in Digital Video Technology and Solutions. For more information please visit or <http://www.keydigital.com>. For more information on Compass Control[®] please visit <http://keydigital.com/compass>. Key Digital[®] will be displaying Compass Control[®] at CEDIA 2012 – for more information [click here](#) or visit us at Booth #2046. Also please download the Compass Control[®] demo app by [clicking here](#).
