Key Digital to Hold Press Event for Official Launch of Compass Control®

Mount Vernon, NY. Key Digital Systems, Inc. – April 15, 2012 – Key Digital is excited to announce that it will be holding an exclusive press event on May 7th, 2012 for Compass Control®. Compass Control® represents the first fully integrated major control system built from the ground up to use Apple's iOS 5 devices – iPad®, iPhone®, and iPod touch® – as its backbone.

The press event will begin at 10:30 AM with a tour of Key Digital's facilities at their Mount Vernon, NY headquarters. The formal press introduction to Compass Control® will begin at 11:00 AM and will end at 12:30 with a lunch for members of the media. Directions to Key Digital's headquarters can be found by [clicking on this text](#). Members of the press wishing to attend the Compass Control® release event can click [here](#).

Key Digital® in conjunction with Compass Control's Compass Alliance Partners (CAP) has created a fully integrated control system with driver support for hardware from the following brands: Aprilaire, Boston Acoustics®, ClearOne®, Denon, Furman, ICRealtime Security Solutions®, iPort®, Key Digital, LG, Lutron®, Luxul, Marantz®, MechoSystems, Onkyo®, Panamax, Primeview, Russound®, SurgeX, and Wolfvision®. Combining the knowledge and expertise from the different CAP brands has allowed Compass Control® to develop into a complete turnkey residential or commercial control solution.

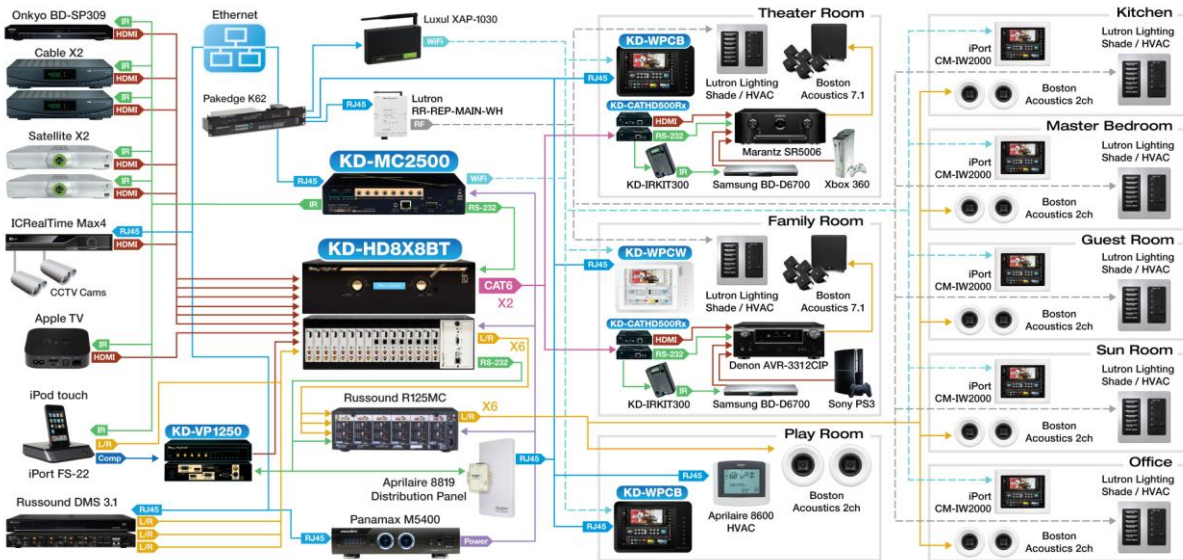

Compass Control® has the ability to control devices via RS-232, IR, or via TCP/IP. This new control system provides installers with bi-directional IR, two-way RS-232 with feedback, and two-way TCP/IP control for unlimited flexibility and maximum compatibility with new or existing devices. Compass Control® also provides control via relays and sensors demonstrating its nature as a powerful integration tool. When programming the system via the Compass Navigator® PC editor software, installers are given three separate database managers to make programming faster than traditional control systems. Compass Navigator® also enables installers to edit command code sets which allows Compass Control® to be tailored to each and every system installation.

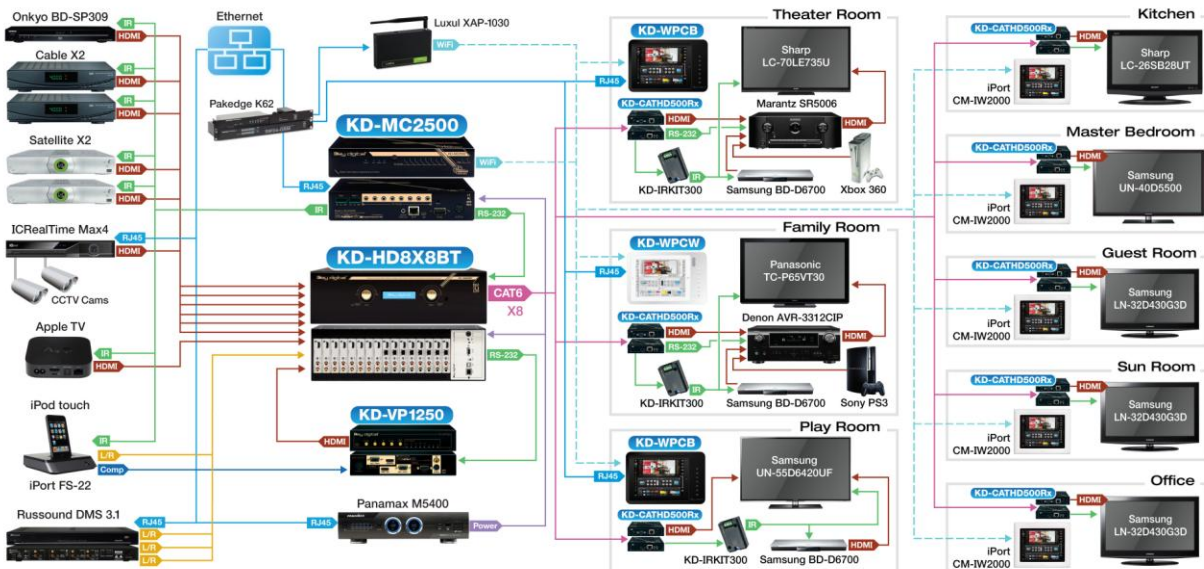

Come see today why Key Digital® and CAP are *the* Experts in Digital Video Technology and Solutions. For more information please visit or <http://www.keydigital.com>. For more information on Compass Control® please visit <http://keydigital.com/compass>. The official press launch for Compass Control® will be held at Key Digital's Mount Vernon, NY headquarters on May 7th, 2012 – for more information [click here](#). Key Digital® will be displaying Compass Control® at InfoComm 2012 – for more information [click here](#) or visit us at Booth #C5438. Also please download the Compass Control® demo app by [clicking here](#).
