Key Digital High Definition Video System Installed at a Prestigious Manhattan High Rise

Mount Vernon, NY. Key Digital – August 15, 2013 – KD-MSCAT16X16, Key Digital’s matrix switcher was a key element of a high-end installation for an apartment at the prestigious address of 1 Central Park South in New York City by Paulo Goncalves, an installer with EP Solutions.

According to Paul, this residence required analog video distribution for five cable boxes and five blu-ray players to six different televisions in two different apartments (the apartments were linked together). Paulo also discovered that a previous company had pre-wired the residence with CAT5 and took that into consideration when making a choice in a matrix switcher. He suggested that the owner of the residence purchase a Key Digital Hercules Series™ model KD-MSCAT16X16 matrix switcher because of its convenience and value. The KD-MSCAT16X16 was able to make use of the pre-existing CAT5 wiring and did not require extra transmit baluns which not only kept the project in budget, but also made great use of limited space. Paulo commented that choosing the KD-MSCAT16X16 was a “no-brainer” and was, “the perfect solution for this situation.”

Paulo’s previous experience with Key Digital was with the Hercules Series™ KD-HDMS4X4 HDMI matrix switcher and the Fat Boy Series KD-MSA8X8Pro audio matrix switcher. He noted that the Hercules Series KD-MSCAT8X8 matrix switcher was, “complete, easy, and gave total control.” In fact the KD-MSCAT16X16 is flexible enough for any application as eight outputs distribute Component or RGBHV Video, Analog Audio, Digital Audio, and Control Signals up to 1,000 ft all over a single CAT5 cable. Having already familiarized himself with Key Digital products, Paulo had a successful experience with his installation and was able to make CAT5 cable runs to six TVs spread out between the two conjoined apartments.

At the end of the project Paulo was satisfied and confident that Key Digital had given him the necessary tools for yet another bulletproof installation in New York City - one of the most demanding cities in the world.

Key Digital Industry Leadership

Mike Tsinberg, Founder and President of Key Digital, is a holder of 40 HDTV patents.

- “Father of DVD” - Developed architecture and system software for world first Digital Video Disk (DVD) MPEG2 based authoring system - key DVD enabling technology
- Participated with Emmy Award Winner for DVD technology development
- 2009 Inductee as one of the Top 200 Pioneers of HDTV by the Academy of DTV Pioneers (CEA)
- SMTPE Fellow

About Key Digital®

Key Digital®, an award winning (CES, CEDIA, InfoComm, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, delivering total video systems solutions. The company manufactures a wide range of digital video processing and video signal distribution solutions marketed broadly to the HDTV community, such as digital video and audio processors, switchers, distribution amplifiers, cables, adapters, and more.
