For Immediate
Release**All current Ashly Audio Products with Ethernet or RS-232 Control Capability are Now Compatible with Compass Control® Technology*****Bi-directional driver gives integrators a plug-and-play solution***

Mount Vernon, NY. September 1, 2013—Key Digital, an award winning (CES, InfoComm, NAHB and CEDIA) developer and manufacturer of leading-edge technology for HDTV applications, has announced that all current Ashly audio products with Ethernet or RS-232 control capability are now compatible with the Compass Control®, the first fully integrated major control system built from the ground up to use Apple's iOS devices – iPad®, iPad mini®, iPhone®, and iPod touch® – as its backbone.

Engineers at Compass Control® profiled Ashly audio products and completed a bi-directional driver that enables their seamless integration in the Compass Control® environment while greatly reducing the installation time for integrators. Compass Control® has access to Ashly product features such as gain, mute status, preset recall, etc.

The list of audio products by Ashly that integrate with Compass Control® system includes:

- ne24.24M matrix processor
- ne4400, ne4800, ne8800 processors
- Protea 3.6SP, 4.8SP processors
- ne8250, ne4250 multichannel amps
- ne800, ne1600, ne2400 amplifiers
- nXe & nXp amplifiers
- Pema powered processors

“Resulting from cooperative efforts between Key Digital and Ashly, the integration of its audio products within the Compass Control® environment represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality,” stated Key Digital’s Vice-President of Sales, Michael Lakhter. “The Compass Alliance™ Partners have come together to create a system that has full

driver integration already completed, increasing efficiency for integrators,” Lakhter concluded.
