For Immediate
Release**Compass Control® Technology Now Compatible With dbx®
ZonePRO® 1260*****Bi-directional driver gives integrators a plug-and-play solution***

Mount Vernon, NY. September 8, 2013—Key Digital, an award winning (CES, CEDIA, InfoComm, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, has announced that the dbx ZonePRO 1260 is now compatible with the Compass Control System, the first fully integrated major control system built from the ground up to use Apple's iOS devices – iPad®, iPad mini®, iPhone®, and iPod touch® – as its backbone.

The dbx ZonePRO Digital Zone Processors were designed to provide flexible programmable zone processing for multi-zone commercial applications. They provide every tool required for maximizing system performance. From signal routing to control to processing, the ZonePRO is a complete multi-zone audio solution.

Engineers at Compass Control profiled the ZonePRO 1260 and completed a bi-directional driver that enables seamless integration of ZonePRO 1260 in the Compass Control environment while greatly reducing the installation time for integrators.

“A control interface is the gateway into a system for a user and delivering the right interface is key to providing a great user experience,” stated Harman Signal Processing’s Installed Sound Market Manager, Iain Gregory. “The support of the ZonePRO natively within Compass Control allows straightforward of user-specific interfaces through the simple step-by-step programming of a Key Digital-controlled ZonePRO audio system.”

“Resulting from cooperative efforts between Key Digital and dbx, the integration of the dbx ZonePRO 1260 within the Compass Control environment represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality,” stated Key Digital’s Vice-President of Sales, Michael Lakhter. “The Compass Alliance™ Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,” Lakhter concluded.
