Compass Control[®] Delivers Full IP Controlled Video Distribution System in Rocky Gap Casino Resort

Mount Vernon, NY. Key Digital Systems, Inc. – May 8, 2013 – Smartv of Germantown, MD has delivered cost effective and black box free integration to its client Rocky Gap Casino Resort with unique and benefit packed feature set of Compass Control[®].

Compass Control[®], the latest innovation from Key Digital, represents the first fully integrated major control system built from the ground up to use Apple's iOS devices – iPad[®], iPad mini[®], iPhone[®], and iPod touch[®] – as its backbone.

Smartv installed its latest 100% IP system at the Rocky Gap Casino Resort in Cumberland, MD, where 16 DirecTV satellite receivers were extended via KD-CATHD500 HDBaseT balun pair with Ethernet extension. After the installation, Rocky Gap facility manager was able to easily control 16 DirecTV Satellite receivers and IP televisions from his iPad in the Compass Control[®] without the need for any master controlled hardware.

In a typical situation Key Digital's Compass Control[®] system capitalizes on the IOS devices, network based connectivity with the IOS controllers communicating via IP to the KD-MC2500. However, with the growth of IP control connectivity in the audio video and electronics industry, Compass Control[®] fully enables hardware free control platform.

For matrix switching applications, Key Digital's Compass Control[®] eco system flagship KD-HD8x8BT boasts control of RS 232 devices without the need of any KD-MC2500 master control hardware thanks to the very powerful IP to RS-232 conversion and control routing feature set. Further, solidifying Compass Control's pioneering into all IP integration.

Michael Lakhter, the VP of Sales at Key Digital, commented: "Compass Control[®] represents the culmination of our efforts to create the most powerful, most user-friendly, and most comprehensive control

system available on the market today.”

Key Digital® will be displaying Compass Control® at **InfoComm 2013** in the **Booth #3181**. For more information on Compass Control®, visit <http://keydigital.com/compass>. Additionally, please download the Compass Control® demo app by [clicking here](#).

Key Digital Industry Leadership

Mike Tsinberg, Founder and President of Key Digital, is a holder of 40 HDTV patents.

- “Father of DVD” - Developed architecture and system software for world first Digital Video Disk (DVD) MPEG2 based authoring system - key DVD enabling technology
- Participated with Emmy Award Winner for DVD technology development
- 2009 Inductee as one of the Top 200 Pioneers of HDTV by the Academy of DTV Pioneers (CEA)
- SMTPE Fellow

About Key Digital®

Key Digital is a CES award-winning developer and manufacturer of leading-edge technology for HDTV applications, delivering total video systems solutions. The company manufactures a wide range of digital video processing and video signal distribution solutions marketed broadly to the HDTV community, such as digital video and audio processors, switchers, distribution amplifiers, cables, adapters, and more.
