For Immediate RELEASE

Key Digital® Presents New Compass Control Master Controller KD-MC1000

Mount Vernon, NY. Key Digital, Inc. – June 26th, 2014 – Key Digital®, an award winning (CES, InfoComm, CEDIA, NAHB) manufacturer of leading-edge technology for HDTV applications, presents their new Compass Control master controller, the KD-MC1000 for the upcoming CEDIA 2014 tradeshow in Las Vegas, Nevada. Compass Control® is the first fully-integrated major control system built from the ground up to use Apple's iOS devices – iPad®, iPad mini®, iPhone®, and iPod touch® – as its backbone.

The KD-MC1000 is a smaller unit than the KD-MC25000, with a size of 6.5" x 4" x 1.2". The KD-MC1000 features 6 multi-functions 3.5mm universal ports for IR/RS-232, 1 Relay port, and 1 ZigBee port for a total of 8 control ports. It offers LAN Based Control via an RJ45 connection. The unit also features sensor and relay control, Indicator LEDs and an IR learning window, which enables learning of any IR code.

The KD-MC1000 will integrate with Key Digital's Digital IQ Series™ and Champion Series™ HDMI/HDBaseT Matrix switchers to increase control port options. Users will have complete control of their audio, video, HVAC, lighting, shades, security and more using any of Key Digital's Compass Alliance Partners Bi-Directional drivers.

Today's installers need reliable products for integration of video and audio in commercial and residential applications. This is why the KD-MC1000 will come with a Limited Lifetime Warranty.

For more information on how Key Digital® is revolutionizing digital video transmission, visit <http://www.keydigital.com>.

Key Digital® will be exhibiting at CEDIA 2014. For more information [click here](#) or visit us at Booth 420.
