For Immediate RELEASE

Key Digital® Showcases HDBaseT Extenders: KD-CATHD250Lite and KD-CATHD250POH

Mount Vernon, NY. Key Digital, Inc. – July 15th, 2014 – Key Digital®, an award winning (CES, InfoComm, CEDIA, NAHB) manufacturer of leading-edge technology for HDTV applications, showcases the FatCAT Series™ model KD-CATHD250Lite and KD-CATHD250POH HDBaseT/HDMI Extender for the upcoming CEDIA 2014 tradeshow in Las Vegas, Nevada. These products are designed for commercial and residential applications where long CAT5e/UTP and CAT6/STP cable runs are impeding digital video signal transmission. As leaders in digital video technology, Key Digital® produces a variety of HDMI extenders to provide solutions to installers of commercial and residential A/V systems.

The FatCAT Series™ KD-CATHD250Lite and KD-CATHD250POH allows extension of 1080p/60, 1920x1200, 3D signals up to 210 ft. on CAT5e/UTP; 250 Ft on Key Digital's KD-CAT6STP1X CAT6/STP cable. 4K signal extension is 120 ft. via CAT6STP1X CAT6/STP cable. KD-CATHD250Lite and KD-CATHD250POH extend IR and RS-232 for controlling remotely located equipment. The KD-CATHD250POH utilizes power over HDBaseT technology, only requiring power on the Tx side.

The FatCAT Series™ models KD-CATHD250Lite and KD-CATHD250POH utilizes HDBaseT Technology for reliable long distance signal extension of full HD, 3D, 4K, IR, and RS-232 control signal via a single CAT cable. Key Digital's extenders auto-adjust, equalization and amplification as needed, depending on the length of cabling utilized and signal strength.

Today's installers need reliable, easy, and fast integration of video and audio in commercial and residential applications. This is why the KD-CATHD250Lite and KD-CATHD250POH come with a Limited Lifetime Warranty.

For more information on how Key Digital® is revolutionizing digital video transmission, visit <http://www.keydigital.com>. Key Digital® will be exhibiting at CEDIA 2014. For more information [click here](#) or visit us at Booth 420.

Key Digital Industry Leadership

Mike Tsinberg, Founder and President of Key Digital®, is a holder of 40 HDTV patents.

- “Father of DVD” - Developed architecture and system software for world first Digital Video Disk (DVD) MPEG2 based authoring system—key DVD enabling technology
- Participated with Emmy Award Winner for DVD technology development
- 2009 Inductee by HDTV by the Academy of DTV Pioneers (CEA) - Top 200 Pioneers
- SMTPE Fellow
- Adele De Berri Pioneers Award winner at InfoComm 2013

About Key Digital®

Key Digital® is an award winning (CES, InfoComm, CEDIA, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, delivering total video systems solutions. The company manufactures a wide range of digital video processing and video signal distribution solutions as well as control systems marketed broadly to the HDTV community, such as digital video and audio processors, switchers, distribution amplifiers, cables, adapters, and more.
