## **Compass Control® Technology Now Compatible with VidaBox's LiivNAS Media Servers and Dune HD Media Players**

### *Bi-directional driver gives integrators a plug-and-play solution*

**Mount Vernon, NY. March 18, 2014**—Key Digital, an award winning (CES, CEDIA, InfoComm, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, has announced that VidaBox's LiivNAS and Dune HD Media players are now compatible with the Compass Control System, the first fully integrated major control system built from the ground up to use Apple's iOS devices – iPad®, iPad mini®, iPhone®, and iPod touch® – as its backbone.

The Dune HD Media Players consist of the Dune HD Base 3D Media Player (3D Blu-ray / DVD Movie Streamer), Dune HD Smart D1 Media Player (Blu-ray / DVD Streamer), and Dune HD MAX Media Player (Blu-ray / DVD Disc Player + Streamer). These media players include HDMI with full 1080p video & 7.1 lossless audio, with optional 3D support on select models. These players can easily stream digitized content and browse archived movies stored on the Media NAS. In addition, customers can use Play Lite to auto-skip annoying adverts & trailers on Blu-ray archival.

The LiivNAS Media Servers consist of the LiivNAS and LiivNAS Pro and are the most affordable Media NAS with "Drop-n-Rip" archiving for unencrypted music CDs, DVDs, and Blu-rays. The LiivNAS includes 2TB of standard storage and runs silent without a cooling fan. LiivNAS can supports 5+ simultaneous AV streams for whole house AV distribution. The LiivNAS Pro is a more powerful variant, supporting 10+ simultaneous AV streams. It also adds compatibility with both LiivSTOR and LiivJACK add-on units for expandable storage and multi-disc archiving.
