## Compass Control® Technology Now Compatible with ELK Products' M1 Security and Automation Control Systems

### *Bi-directional driver gives integrators a plug-and-play solution*

**Mount Vernon, NY. Key Digital, Inc. – July 17<sup>th</sup>, 2014** –Key Digital, an award winning (CES, CEDIA, InfoComm, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, has announced that ELK Products' M1 Security and Automation Control Systems are now compatible with the Compass Control System, the first fully integrated major control system built from the ground up to use Apple's iOS devices – iPad®, iPad mini®, iPhone®, and iPod touch® – as its backbone.

ELK's M1 Controls incorporate security, fire, door entry control, and energy & task management to provide total control of home or business. The M1Gold & M1EZ8 offer a truly integrated solution. These IP accessible systems offer simple, yet powerful on-site and remote user interfaces, giving the consumer full control anytime, from anywhere.

The M1 Gold's built-in voice dialer can call up to 8 phone numbers and alert owners of status changes; such as, critical temperature levels, water leaks, children arriving home from school, etc. Built-in telephone remote control allows you to control temperature settings, water heater, garage door, lighting, and sprinklers plus arming/disarming system and more; by simply picking up the phone – any phone. Integrators and Installers will value the flash memory firmware, RS-232 serial port, Ethernet connectivity option, and PC programming in English text.

The M1EZ8 offers an economical solution for installations not requiring the voice and telephone remote control capability of the M1 Gold. Built on the same software architecture as M1 Gold, the possibilities for expansion, networking with other systems, and option for programming and control over the internet make M1EZ8 an exceptional value.
