## Compass Control® Technology Now Compatible with Sonos Products

### *Bi-directional driver gives integrators a plug-and-play solution*

**Mount Vernon, NY. Key Digital, Inc. –December 22<sup>nd</sup>, 2014**–Key Digital, an award winning (CES, CEDIA, InfoComm, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, has announced that Sonos products are now compatible with the Compass Control System, the first fully integrated major control system built from the ground up to use Apple's iOS devices – iPad®, iPad mini®, iPhone®, and iPod touch® – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Sonos products. These products and profiles are rigorously tested by Key Digital. Now Compass Control users can use any of their Sonos products with just a touch of a button. Compass Control driver library is expanding every day to bring the best quality and product selection to its users.

Sonos products allow customers to have access to their music library or connect to their music streaming services. Products compatible with the Compass Control system are: Play:1, Play:3, Play:5, Playbar, Sub, Connect:AMP, and Connect. Using the Compass Control app, Sonos users will have all the features they had with their Sonos controller they were previously using on their smartphone or tablet. With the compatibility of this system users will be able to have the complete home music experience with the immersive HiFi sound they love.
