

Hardwired Network Connection for iOS Device

Providing a hardwired network connection to your iOS Device will increase reliability and speed of network communication.

Both Compass Control and KD-App can benefit from a hardwired connection. Especially if utilizing the video preview feature of an Enterprise AV system.

Needs

- USB to Ethernet converter
- Lightning to USB converter
- USB hub with recommended 5V2A output on USB ports to provide power to USB to Ethernet converter and iOS device

Connectivity

Viewing & Setting IP Address

- The iOS device recognizes the hardwired Ethernet connection.
- Enter Ethernet to view the iOS device's network settings:
