## **Key Digital<sup>®</sup> Opens Your Eyes to HDMI with Manufacturer Trainings and Video Classes at CEDIA 2006**

Mount Vernon, NY– **Key Digital Systems (Key Digital<sup>®</sup>)**, a leading home theater and custom installation total systems manufacturer, offers informative and practical HDMI – HDCP trainings and instructional video classes at the CEDIA EXPO 2006. Benefit from the experience and perspective of video pioneer and **Key Digital<sup>®</sup>** founder and president Mike Tsinberg, as he opens your eyes to the new world of the HDMI digital interface and HDCP copy protection, and the basics of video and video displays.

The HDMI plug-and-play digital interface is several steps ahead of DVI, supporting both HDTV video and audio. HDMI lets the display communicate with the DVD player or other source, so it can deliver video and audio in formats compatible with the display and audio surround sound processor. By attending these crucial **Key Digital<sup>®</sup>** trainings, you will have the opportunity to learn the benefits and advantages of using HDMI with HDCP copy protection, along with the implementation tricks and pitfalls. Future-proof your next installation and learn all about HDMI and HDCP from Mike Tsinberg, an expert in digital video technology and solutions.

These trainings provide an overview of what you'll need to know about HDMI and HDCP copy protection for your next home theater installation. Product training will then let you walk away in confidence, that you've mastered this latest digital interface standard. You'll learn all there is to know, from choosing the right HDMI cable, to how HDMI lets the display talk to the DVD player. What better way to gain a thorough understanding of the digital interconnect that has become the consumer electronics video and audio interface standard of choice.

The video courses will teach you the basics of video and display technologies.
