Key Digital partner up with Universal Remote Control and Takes Control of Your Home Automation System

Mount Vernon, NY – Key Digital, Inc., the experts in digital video technology and solutions, announced today that they have partnered with Universal Remote.

Universal Remote Control is a world leader in the custom design, engineering, manufacturing and distribution of high-quality remote controls and home automation products. Universal's design and engineering professionals develop products that combine the latest advances in technology with simplicity of consumer set-up and use.

The Universal Remote and Key Digital partner program is designed to establish a tightly integrated network and organizations that is fueled by a common goal of promoting consumer electronic device interoperability in home automation. "Key Digital's collaboration with Universal will enable the use of audio and video processing, switching and distribution while maintaining home automation control and ease of use for which Universal is known for" said Michael Lakhter, Key Digital's VP of Sales.

Universal is one of the industries leading control companies specializing in automation and operation of audio, video and environmental management systems such as lighting and HVAC. Together with Key Digital's highly anticipated video processor the KD-VPHD3 and the new addition to the FAT Boy family the KD-MSV8X8 any install whether commercial or residential becomes a reality. Creating a simple yet elegant system is what makes this partnership a true plug and play solution.

Key Digital[®] Systems is a CES award-winning developer and manufacturer of leading-edge technology for HDTV applications, delivering total video systems solutions. The company manufactures a wide range of digital video processing and video signal distribution solutions marketed broadly to the HDTV community, such as digital video and audio processors, switchers, distribution amplifiers, cables, adapters, and more.
