Key Digital[®] Opens Your Eyes to HDMI and HDCP with four trainings at CEDIA 2005

Mount Vernon, NY– Key Digital Systems (Key Digital[®]), a leading total systems solution provider of custom installation and home theater digital video products, will have four informative and practical HDMI – HDCP trainings at CEDIA 2005. Benefit from the experience and perspective of video pioneer and **Key Digital[®]** founder and president Mike Tsinberg, as he opens your eyes to the new world of the HDMI digital interface and HDCP copy protection.

The HDMI plug-and-play digital interface is several steps ahead of DVI, supporting both HDTV video and audio. HDMI lets the display communicate with the DVD player or other source, so it can deliver video and audio in formats compatible with the display and audio surround sound processor. By attending these crucial **Key Digital[®]** trainings, you will have the opportunity to learn the benefits and advantages of using HDMI with HDCP copy protection, along with the implementation tricks and pitfalls. Future-proof your next installation and learn all about HDMI and HDCP from Mike Tsinberg, an expert in digital video technology and solutions.

These trainings provide an overview of what you'll need to know about HDMI and HDCP copy protection for your next home theater installation. Product training will then let you walk away in confidence, that you've mastered this latest digital interface standard. You'll learn all there is to know, from choosing the right HDMI cable, to how HDMI lets the display talk to the DVD player. What better way to gain a thorough understanding of the digital interconnect that has become the consumer electronics video and audio interface standard of choice.

Key Digital's wide range of leading-edge technology products are rapidly expanding to accommodate the HDMI digital interface, including **Digital Video and Audio Processors; Switchers; Distribution Amplifiers; Video and Interface Adapters;** and **HDMI, DVI, and analog Cables.** **Key Digital's** CES award-winning products are developed as key solutions for HDTV Home Theater Retailers, Custom Installers, System Integrators, Broadcasters, Manufacturers, and Consumers.
